Mockup

An example of a potential user, especially during the ongoing pandemic, is the Gesundheitsdirektion Kanton Zürich, a non-verified account* with a vague username: @gd_zuerich.

https://twitter.com/gd zuerich

* Twitter stopped their verification process (<u>documentation</u>), but verification only shows that the account is authentic, and not any measure of security. In fact, verified accounts have no extra requirements for 2FA or other enhanced log-in methods.
